Summary

Software artisan.

Making things happen since 2014.

Currently in PHP stack with Laravel as main framework. Clean, maintainable and robusted code as base.

GIT master. No code without GIT please!!!

SEO friendly and self learned about that, specially about web performance optimisation. Also very interested in user experience and performance.

Currently working on:

- PHP + Laravel + MySQL + Redis + SQS + GIT
- Owns UX and SEO tools & projects

Interesting in making a new agile and easier web for everyone.

Experience

PHP & Laravel Software Artisan

Palisis

Sep 2016 - Present (5 years 1 month +)

Working as a software artisan in PHP + Laravel mainly.

Participating in interesting new backend projects and new API design.

API integrations with different customers.

Real time updates and queries based in performance.

Also I have been upgrading legacy code from PHP 5.6 until 8x ... at the moment. And Laravel versions since 5.4 until 8x.

-- Main:

- * Git master.
- * Clean code and SOLID principles.
- * PHP mainly (5.6, 7.2, 7.4, 8.0)
- * Laravel (5.4, 5.7, 8)
- * Testing and TDD ambassador. PHPUnit - Unit testing - Integration testing - Xdebug
- * DDD domain driven design (hexagonal architecture)
- * Proficiency in asynchronous systems (event-driven)

- * SQS and RabbitMQ - Queues for RTU (Real Time Updates)
- * NoSQL and caché systems (Redis)
- * SQL Databases (Mysql & RDS)
- * AWS environment
- * Vagrant + Docker
- * APIs Design (REST, Restful)
- * HTML CSS 3 and native JavaScript
- * SCRUM for agile development
- * Architect Patterns (MVC)
- * Design Pattern (Singleton, Observer, OOP)
- * SOAP
- * Knowledge of data structures and operations with them, Big-O notation (code complexity)

-- Also noticed:

- * SEO
- * Online Marketing
- * User Experience Design
- * Requisite collection
- * Heuristic evaluations
- * Usability tests
- * Interviews with stakeholders

Freelance Blogger. Teacher

jrgonzalez.es

May 2011 - Present (10 years 5 months +)
